The mission of the Berlin Institute of Health at Charité (BIH) is medical translation: transferring biomedical research findings into novel approaches to personalized prediction, prevention, diagnostics and therapies and, conversely, using clinical observations to develop new research ideas. The aim is to deliver relevant medical benefits to patients and the population at large. The BIH was founded in 2013 and is funded 90 percent by the Federal Ministry of Education and Research (BMBF) and 10 percent by the State of Berlin. Since 2021 the BIH has been integrated into Charité as its so-called third pillar.

For the building of the new field “Clinical Incubator” we are looking from the 01.04.2024 temporary for a 

**Head of Clinical Incubator (f/m/d)**

in full-time

The clinical incubator advanced regenerative and personalized therapies is intended as a multiplier and catalyst to support the implementation of new research results in the field of regenerative medicine and to accelerate the implementation and transfer to clinical applications and products in a targeted manner. Embedded in the academic institutions, the clinical start-up incubator is intended to promote start-ups and entrepreneurial activities. For this purpose, targeted services, project financing, regulatory advice etc. are provided to support and “boost” high-quality translational approaches. As a manager, you will independently take on the construction and design of the BIH Booster. You identify suitable advisory and support services and are responsible for the provision and organization of the booster and its activities for scientists in the Berlin life science sector for the implementation of their translative projects.

**Your work area:**

- Establishment and design of the clinical incubator, management of the strategic and operational organization of the clinical incubator advanced regenerative and its activities.
- Identification, organization, development and provision of suitable consulting and support services for translational projects.
- Integration of the clinical incubator and its activities into the local life science, entrepreneurship and start-up ecosystems.
- Establishing a close cooperation between the clinical incubator and its activities in the clinical start-up and life science network.
- Embedding and integration of all clinical incubator activities and offers in and to the BIH / Charité structures and the medical / scientific environment.
- Expansion of the local, national network of cutting-edge research, entrepreneurial activities in the clinical, translational life science area as well as suitable networks, events and activities for internal and external communication of the clinical incubator activities, offers and services.

**What you bring with:**

- University degree (diploma / master's / cf.), preferably doctorate or second degree / additional qualifications
- Several years of management experience in the academic / entrepreneurial field of life science related to translation, technology transfer, entrepreneurship
- Comprehensive legal, financial expertise in the field of project, company and investment projects as well as VC financing as well as in translation through start-up or investment projects as well as know-how sales, licensing and legal marketing
- Several years of management experience in the academic / entrepreneurial field of life science related to translation, technology transfer, entrepreneurship
- Regulatory expertise in licensing procedures and projects
- Experience in setting up and / or managing start-ups, companies, associations or product development and innovation management in the medical / life science sector as well as in setting up and operating networks and support structures such as incubators, translation structures, support structures for the commercialization of new findings

What we offer:

- A full-time position (39h/week) limited until 31.03.2029
- Remuneration taking into account personal requirements up to TVöD VKA-K EG15
- Flexible working hours and the possibility of mobile working within Germany and abroad in accordance with internal regulations (in consultation with the legal team)
- Various support services to help you combine work and family life (childcare, voio)
- 30 vacation days per year (with a five-day week)
- Very good training and further education opportunities
- Mobile citizens' office on site
• Additional benefits customary in the public sector (e.g. annual bonus, company pension scheme (VBL))
• Very easily accessible and attractive workplace in the location name, Föhrer Straße 15 Campus CVK, 13353, Berlin

We live diversity!

BIH strongly encourages qualified women to apply. Applicants with severe disabilities and those of equal status will be given preferential consideration in the event of equal suitability.

Please submit your application via the BIH career portal [https://jobs.bihealth.org](https://jobs.bihealth.org) by 25.03.2024, quoting the reference number BIH-22.24.

**Note:** If you have a foreign university degree, please note that it may be necessary to obtain a certificate from the ZAB. You can find more information at: [https://www.kmk.org/zab/central-office-for-foreign-education.html](https://www.kmk.org/zab/central-office-for-foreign-education.html)

For those born after 1970, proof of measles immunity / measles vaccination is required.
